

Digital Workplace Services, Cloud & Infrastructure

Activate ServiceNow® Vulnerability Response

A fixed-price, best-in-class implementation packaged with CMDB integration and automated remediation as a standard.

Milestone Technologies delivers robust Vulnerability Response services through ActivateVR -- a rapid deployment, fixed-price Vulnerability Response solution. ActivateVR integrates advanced automation with your ServiceNow instance for efficient identification, assessment, and mitigation of security vulnerabilities, ensuring constant protection and rapid time-to-value. We create a single-pane view of vulnerabilities and empower our clients to create modernized, transformative vulnerability management strategies to meet business goals and priorities.

Automated Remediation Included

Manage patches and patch deployments for critical assets with ActivateVR.

ActivateVR uses imports from third-party solution integrations and patch vendors. You submit patch requests for approval, schedule patch updates to resolve vulnerable items, and monitor remediation progress, all from a single workspace on your Now Platform.

A common blocker we hear about is a mismatched inventory barrier. ActivateVR solves that.

Patch Vulnerabilities in Real-Time

Maintain a proactive stance against potential attackers, neutralizing threats before your confidential information is compromised.

Rapid Deployment

ActivateVR is a fixed-price, best-in-class delivery model for swift and effective Vulnerability Response.

Efficient Triage

ActivateVR accelerates Vulnerability Response time through effective prioritization and assignment — based on asset impact and business value.

Comprehensive Reporting

Benefit from a centralized dashboard for real-time vulnerability monitoring and management.

ActivateVR Makes the Unsustainable, Manageable.

- 75%** Faster identification of threats
- 60%** Faster prioritization, driven by business severity
- 71%** Faster remediation with automation included
- 50%** Reduction in FTE overhead associated with Vulnerability Response

Explore Milestone Technologies Today

Discover how Milestone can support and accelerate your digital transformation with project based services and expertise for optimizing efficiency, increasing productivity enhancing security, minimizing cost, and maximizing ROI.

Digital Workplace Services, Cloud & Infrastructure

Activate ServiceNow® Vulnerability Response

Built on Decades of Cyber Security Experience and Hundreds of Successful implementations

With decades of knowledge and experience, we have developed a best-practice approach for delivering Vulnerability Response. Our customers benefit from hyper-focused care being included with staff training and persona-based documentation.

Milestone Technologies' ActivateVR integrates your vulnerability scanner into your organization's CMDB, increasing its effectiveness, accuracy, and ROI.

Best Practices Approach

Initial Assessment

Milestone Technologies conducts a comprehensive review of your existing Vulnerability Response, threat intelligence, and security incident response processes.

Customization

ActivateVR aligns with your specific needs and security requirements.

Implementation and Integration

ActivateVR integrates with your ServiceNow instance and existing security tools for efficient operation.

Continuous Monitoring and Improvement

Enjoy ongoing support and updates, ensuring your Vulnerability Response evolves with changing security landscapes and business needs.
