

Find Technical Staff for Your Critical Projects

Businesses often face the challenge of searching for qualified, skilled workers to address short-term needs.

One way to meet these needs is through staff augmentation. The main benefit to staff augmentation is that trained and qualified workers can hit the ground running and seamlessly blend into full-time teams. Companies can scale up or down to meet fluctuating staffing demands without the costs of hiring permanent, full-time employees.

Specialists in Senior Technical Workforces

Based in Silicon Valley, Milestone Technologies is a preferred partner for a global clientele, including many of the world's fastest-growing companies. We provide customized services to address a wide variety of workforce needs, including long-term contract, short-term contract, contract-to-permanent, direct placement, and enhanced staffing services. Our focus is on providing the appropriate talent and managing all hiring tasks on behalf of our clients with an efficient and seamless process.

Milestone has the technical knowledge, resources, and skills to find the right resource for any position you may need to fill. But we know it takes more than that to be successful. We work closely with our clients to understand their specific requirements beyond just technical skills. Milestone utilizes a rigorous qualification process to identify the right person for your position.

CONTRACT STAFFING

Milestone is here to help you find the right candidate for your contract staffing position quickly. Our recruiters and account managers then remain in close communication with our consultants throughout the contract, ensuring our people have everything they need to get the job done for you.

DIRECT HIRE

Sometimes clients require a direct hire. If that's the case, we will partner with you to find the best fit for the position. We use our rigorous qualification process to identify the right person for your position, regardless of whether it's full time, contract, or a contract-to-hire position.

CONTRACT-TO-HIRE

There's a lot to gain from doing a contract-to-hire. The contract period is one long interview for your full-time opening. The extended exposure to our consultant will help you determine whether they are the perfect fit.

You work side-by-side with the candidate and make sure they bring the right skill sets and experience to your organization.
