

Digital Workplace, Cloud, & Infrastructure

Data Center Operations & Supply Chain Services

Keep Your Data Center Running at Peak Performance

Milestone offers a flexible range of customizable management and support services designed to improve operational uptime and stability while modernizing your Data Center (DC) operations to serve your business needs better.

Data Center Operation Services

Milestone delivers comprehensive data center infrastructure deployment, management, and support services, including smart hands that drive daily operations and continuous service improvements for data center infrastructure components. Our modern solutions help you achieve greater efficiencies for data center operations while optimizing expenditures.

Onsite & Technical Services

Our global “Smart Hands” teams ensure service stability, compliance, and uptime to meet the physical and logical requirements of maintaining and supporting your data center infrastructure.

- Hardware Install, Rack & Stack, and Moves
- Asset Audit including Structural Integrity of Infrastructure
- Server Maintenance and Troubleshooting
- Third-party Vendor Management
- Flexible 24/7 Support

Data Center Network Services

Optimize uptime and reliability of your infrastructure with Milestone’s Data Center Network solution. Experts provide end-to-end deployment, configurations, management, and support of your network infrastructure.

- Rack/Cabinet/Patch Panel Deployment and Support
- Structured Cabling Management and Support
- L1/L2/L3 Network Support Services including Wi-Fi infrastructure
- Network & Server - Staging, Configuration Management, and Troubleshooting Support
- Auditing and Compliance – Patching, Cable Connectivity, Labeling, Power Matrix

Supply Chain Services

Providing a superior way to leverage and track hardware, Milestone’s Supply Chain competencies offer an end-to-end lifecycle plan to allow forecasting and visibility into the inventory health and logistics of the program to optimize your Supply Chain operations.

- Warehouse Management & Operations
- Inventory Cycles Count
- Asset Lifecycle Management
- Shipping, Receiving, and Distribution
- Decommissioning and Retirement
- RMA Reconciliation

Data Center Infrastructure Management Services

Track & monitor various key aspects of your data center performance utilizing DCIM tools. Milestone’s solution continuously monitors and manages your Data Center infrastructure components to enable optimization down to the rack level.

- Power and Cooling Monitoring and Analytics
- Environment Monitoring and Analytics
- Capacity Planning including Space Management
- Infrastructure Discovery and Dependency Mapping
- ITIL Best practices including Change Management and Governance

Data Center Operations & Supply Chain Services

Best Practices & Service Delivery Approach

How do you improve your steady state to scale and enhance the efficiency and performance of your data center operations? Milestone has end-to-end data center solutions that employ a proven core service delivery model consisting of:

1. Resource Capacity Management
2. Service Scalability & Stability
3. Service Performance Monitoring and Compliance to SLAs/KPIs/OLAs/XLAs
4. Service Agility & Efficiency
5. Service Strategy & Innovations
6. Service Collaboration & Governance
7. Service Reporting and Insights for Continual Service Improvements
8. Data Center Security Auditing & Compliance

Milestone manages Data Center Operations globally for over 9 million servers and infrastructure devices across multiple continents.

Milestone Success Story

An American ride-sharing and food-delivery service company with over 118 million active monthly users in 2021 needed a service improvement solution for their North America operations.

Customer Challenge

The client needed a more effective and efficient data center operations solution to support its 180,000 servers and 70,000 annual ticket intakes and turned to Milestone to deliver the goods.

The Milestone Solution

Milestone engaged client and incumbent workforce to discover needs, challenges, gaps, and leadership requirements, then engineered a comprehensive solution that transformed processes to meet industry best practices and ensured streamlined delivery of services and operational needs.

Results

Milestone delivered a data center infrastructure solution that streamlined the delivery of services, quickly improved operational efficiency, and enhanced the customer experience.
