

Ready to take the next step in your Security Operations Journey?

Introducing the Security Operations Readiness Assessment

Evaluation, guidance, and implementation planning to maximize ServiceNow Security Operations success.

Pave the way for a successful ServiceNow Security Operations implementation:

- **Determine Current Security Operations Posture** | Covestic will perform a review of existing Vulnerability Response, Threat Intelligence, and Security Incident Response processes and tools to identify any gaps or opportunities prior to implementation.
- **Understand the ServiceNow Ecosystem** | Covestic will help your team establish a common understanding of the ServiceNow platform and how Security Operations functions within the ecosystem.
- **Maximize ServiceNow ROI Quickly** | Covestic will perform a readiness assessment to close gaps and establish a phased roadmap and implementation plan.

SECURITY EXPERTISE

Work with a world-class ServiceNow Security Operations consulting team to assess and plan your Security Operations implementation.

SERVICENOW PLATFORM EXPERTS

With deep ITSM and ITOM experience, we understand the importance of the Configuration Management Database in building a successful and complete Security Operations posture.

PROVEN TRACK RECORD OF SUCCESS
