

IT Relocation and Technology Deployment Experts

From Dock to Decommissioning, our IT Relocation team delivers exceptional support from highly-skilled experts who work with you to understand your data center and office space needs, then develop and execute an optimized project plan for your IT relocation.

Complete IT Relocation, Deployment and Operations Support Services

Milestone Technologies supports our clients' digital transformation initiatives as they update their data center and real estate strategies to optimize efficiency, increase productivity, reliability and security, and minimize costs. Our expertise extends from initial assessments to the final retirement of physical assets. This includes IT hardware and end-user device asset life-cycle management and operations support. The Milestone team is trained in industry-leading best practices for device handling (Moves, Adds, Changes), documentation and ticketing support.

Successful Data Center Relocation Projects

- We provide a turnkey solution for your IT Relocation projects from project management, technician support and logistics with a focus on minimizing business impact and ensuring business continuity.
- We follow strict protocols in documenting, labeling, handling, packing and transporting your IT hardware and end-user devices for safety and security.
- Our services allow our clients to focus on core activities while we manage the assessment, planning, execution and QA for your relocation and deployment projects.
- Communication is key with all stakeholders to meet client expectations and achieving the milestones of the project in a timely manner, leaving you with a final result that leaves you with an optimized environment to meet your business objectives.

IT Office Relocations Require Coordination Between Real Estate, Finance, Facilities and IT

Expansions, consolidations, and lease expirations are problems for all businesses. When such events take place, coordination between real estate, finance, facilities, and IT departments is paramount. Relocations require a blend of technical knowledge and expertise to lead the planning, design, budgeting, and management of the work effort. Milestone provides a blueprint of the costs, time and risk associated with your IT relocation. This roadmap will help you avoid the pitfalls associated with IT relocations that are often overlooked when a company's internal team plans a relocation.

Assessment and Preparation	Move Services	Project Delivery Workflow
<ul style="list-style-type: none"> • Inventory audits • Draft rack elevation diagrams • Document network port-mapping • Labeling hardware and cables • Asset tagging • Data Input for planning and environment optimization • Procurement: racks, PDUs, structured cabling, patch cables, switches 	<ul style="list-style-type: none"> • Dedicated experienced Project Manager(s) • Dedicated Tier 3 Lead Technicians to manage quality and execution • Trained and experienced Data Center Technicians to execute the relocation • Mature processes that ensure efficient and high-quality moves 	<ul style="list-style-type: none"> • Decommissioning • Tear-down: disconnect and package devices for safe transportation and check-out • Logistics Support: delivery and warehousing • Receiving • Deployment • Turn-up • Post-move Support: assurance to troubleshoot
<p style="text-align: center;">Post-Move Consulting</p> <p>Project completion activities with punch list completion, documentation of all relocated elements, clean-up, and client acceptance allows your business to quickly and efficiently shift your focus back to operations.</p>
